Programming
→ Java
→ Python
→ Javascript
→ C
→ HTML/CSS
→ Verilog
→ OCaml
→ Assembly

Technology
→ NodeJS
→ LevelDB
→ Express.js
→ Hapi
→ Raspberry Pi
→ Arduino

Operating Systems
→ Windows
→ Linux

Languages
→ English
→ Russian
→ German

Interests
→ Jazz Piano
→ Theater
→ Vinyl collecting
→ Fishing
→ Skiing
→ Logic games

Education

University of Pennsylvania – School of Engineering & Applied Science — Philadelphia, PA — May 2020 — 3.41/4.00
B.S. Engineering: Computer Science | Minors: Mathematics and Physics

→ Coursework: Statistics & Machine Learning, Data Structures & Algorithms, Computer Organization & Design, Introduction to Computer Systems, Programming Languages & Techniques, Complex Analysis, Advanced Linear Algebra

Projects

iCane | https://github.com/pixelyunicorn/icane — January 2018

→ (Raspberry Pi, C) A cane powered by Raspberry Pi that uses ultrasonic sensing to detect and recognize objects to assist the visually impaired.
→ (HTML/CSS, Javascript) A web app that uses beacons placed in buildings to send the user his location, which is converted to audio via a text-to-speech API.
→ Third place, organizer's choice, and Globo sponsorship prize at DragonHacks.

Othello | https://github.com/kofmangregory/Othello — December 2017

→ (Java) The game Othello using Java's Swing package.

Thermal Conductivity Calculator — May 2017 – August 2017

→ (Python) An applet to calculate the heat energy across various materials with various geometries using data from NIST.

SmartCup | https://github.com/DanBarychev/SmartCup — September 2015

→ (Arduino) A cup holder powered by Arduino that reports the ideal drinking temperature of a liquid.

Professional Experience

Balloon-borne Large Aperture Submillimeter Telescope, Researcher — March 2017 – Present

→ Developed the thermal conductivity calculator, updated and upkept the website, built a hard drive tower in a vacuum vessel, assembled and tested a solar panel array, and cycled a cryostat to test its helium fridge.

Mechanics Laboratory, Teaching Assistant — August 2017 - Present

→ Set up laboratory equipment, explained lab procedures, graded lab reports, and answered mechanics questions.

Penn Summer Science Initiative, Researcher — June 2015

→ Collaborated in teams of four students in four week-long lab activities with intensive lab reports and presentations.
→ Tested the strengths of concrete mixtures, observed the diffusion of metals, stress-tested polymers, and constructed an OLED.

MedSurvey, Inc., Call Center Representative — Summer 2014 and Summer 2016

→ Screened medical personnel for eligibility in medical market research surveys.

Involvement

Stimulus Children's Theatre, Technical Director, Lighting Designer — August 2017 – Present

Undergraduate Physics Society — August 2016 – Present
